Professional Summary

Results-driven Junior Moodle Developer with 3+ years of progressive experience at Hansetech Soft Solutions (June 2023 – Present), growing from Trainee to Developer delivering enterprise LMS solutions. Adept at custom plugin development (Local, Blocks, Reports), IOMAD multi-tenancy, xAPI integrations, and REST API development. Successfully executed Moodle platform upgrades (3.x to 4.x to 5.0) for international clients with zero data loss, and built scalable reporting systems across high-traffic environments. Additionally experienced in Core PHP development and WHMCS API integration for hosting management portals.

Core Skills

Moodle	Versions 3.x, 4.x, 5.0 Plugin Dev (Local, Blocks, Reports, Modules) Theme Customization IOMAD REST Web Services
Backend	PHP (Core & Moodle), MySQL, MariaDB, PostgreSQL, AJAX
Frontend	HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap
LMS Concepts	SCORM, xAPI (Tin Can), Course Completion, Proctoring, Custom Reporting, User Management
Integrations	Payment Gateways, Zoom, WHMCS API, External APIs, SSO (SAML / OAuth)
DevOps & Tools	Git, GitHub, Linux / Apache Hosting, Cron Jobs, Performance Debugging, Log Analysis

Professional Experience

Moodle Trainee

June 2023 – Dec 2023

Hansetech Soft Solutions Pvt. Ltd

- Learned Moodle architecture, plugin structure, and core LMS concepts under senior developer mentorship.
- Assisted in theme customization, basic plugin development, and platform configuration for live client sites.
- Gained practical experience with PHP, MySQL, and Moodle web service APIs in a production environment.
- Supported the team in debugging, server log analysis, and cron job configuration.

Junior Moodle Developer

Dec 2023 – Present

Hansetech Soft Solutions Pvt. Ltd

- Designed and maintained custom Moodle plugins (local, blocks, reports) and child themes for multiple enterprise clients, directly addressing unique business logic.
- Incorporated third-party systems via Moodle APIs and web services, including Zoom, payment gateways, WHMCS, and external SSO authentication providers.
- Enhanced a custom local plugin for proctoring with video and audio monitoring capabilities to ensure remote exam integrity.
- Executed end-to-end Moodle version upgrades (3.11 to 4.3 to 5.0) for live production sites, achieving zero data loss and minimal downtime.

- ▶ Created performance-optimized SQL-based reports for administrators and trainers, delivering actionable insights on user completion and SCORM activity.
- ▶ Diagnosed and resolved complex Moodle issues through server log analysis (Apache, PHP) and database-level debugging.
- ▶ Configured and managed cron jobs for automated nightly reports, enrollment reminders, and system backups.

Key Projects

Winwork LMS

Dec 2023 – Mar 2024

Stack: Moodle, PHP

- ▶ Modified core SCORM module behavior via a local plugin to capture and display custom xAPI statements.
- ▶ Designed a custom report providing detailed SCORM attempt tracking and completion statuses for instructors.

Mazenet LMS

Jan 2024 – May 2025

Stack: Moodle, PHP, MySQL, Bootstrap, React

- ▶ Developed custom Moodle Web Service APIs to connect the Moodle backend with a React-based frontend application.
- ▶ Built APIs covering courses, enrollments, quizzes, assignments, progress tracking, and file submissions.
- ▶ Enforced secure token-based authentication and role-based access control across all API endpoints.

Corecard LMS

May 2024 – Sep 2024

Stack: Moodle, PHP, PostgreSQL

- ▶ Directed the end-to-end upgrade and architectural overhaul from Moodle 3.11 to 4.3, covering full site revamp, theme modernization, and menu restructuring.
- ▶ Implemented CSV-based bulk user creation with custom L1 and L2 manager assignments.
- ▶ Developed bulk course enrollment and unenrollment workflows via CSV uploads.
- ▶ Built site-wide training reports and automated email notifications for enrollment, unenrollment, and course completion events.

Bank of Uganda – LMS Implementation

Oct 2024 – Feb 2025

Stack: Moodle, IOMAD, PHP, MariaDB

- ▶ Deployed and customized IOMAD for a multi-tenant B2B architecture, enabling isolated reporting and branding per department.
- ▶ Constructed a complex local plugin for tenant-specific report generation, handling IOMAD company-based data separation.
- ▶ Configured automated cron tasks for nightly report generation and enrollment reminder notifications.

Galgano LMS – Time Spent Reporting

May 2025 – Aug 2025

Stack: Moodle, PHP, MySQL, Course Dedication Block, xAPI

- ▶ Extended the Course Dedication Block plugin to capture accurate time-spent data across all courses and activities.
- ▶ Built a custom reporting module delivering course-wise and activity-wise time-spent analytics for administrators and trainers.
- ▶ Developed Moodle scheduled tasks (cron-based) to automatically aggregate and store time-spent data daily.
- ▶ Integrated xAPI (Tin Can) to capture standardized learning statements, enriching overall reporting data.

Eyhost – Hosting Management Portal

Sep 2025 – Dec 2025

Stack: Core PHP, WHMCS API

- ▶ Developed a hosting management portal using Core PHP, handling end-to-end administration features for the platform.

- Built and integrated WHMCS API to manage cart operations, order processing, and client billing workflows.
- Implemented admin panel functionalities including user management, product configuration, and service provisioning.
- Ensured secure and seamless communication between the frontend portal and the WHMCS billing system through API-based integration.

Wordludo LMS

Dec 2025 – Jan 2026

Stack: Moodle 5.0, PHP

- Led Moodle 5.0 customization using the Edma theme across all LMS pages including course landing pages, login pages, and site branding.
- Enhanced the learner UI by customizing Moodle blocks and interface components for a modern, intuitive experience.

Siddhanth LMS

Feb 2026 – Present

Stack: Moodle, PHP, MySQL

- Developed role-based custom dashboards for Admin, Teacher, Non-Editing Teacher, and Student roles, each tailored with contextually relevant data, quick actions, and navigation.
- Implemented core quiz customizations including automatic redirection to a Feedback activity upon quiz submission for a seamless post-assessment flow.
- Built a custom feedback completion handler triggering a branded confirmation popup with a 3-second auto-logout timer and a manual logout button, enhancing exam session security.

Education

B.Tech – Computer Science / IT

Completed: May 2023

ST. Mary's Group of Institutions, Chebrolu | JNTUK
